### **‘TRIBUTE TO MY FATHER ON HIS BIRTH CENTENARY’**

**CA Pankaj Gupta FCA, FCS**

Today I am very pleased to tell you that I have developed totally by myself an Excel Utility which can calculate income tax on a click of button by feeding data in a very simple manner.

I dedicate this to my father whose birth centenary falls today and who was a pioneer to learn and use computers in India. Almost 60 years back, he worked on IBM Main Frame Computers and did programming in Fortran etc. and made calendar program to analyse the readings taken for strength of concrete at various interval of time after laying it at Bhakra Dam. In fact he was awarded certificate by the then Prime Minister of India for being one of the Engineer to be personally responsible for structural safety of Bhakra Dam. Above all his knowledge of Vedas and Shastras was immense and he could relate and integrate science, religion and mathematics very practically and in a fruitful manner. He will ever remain our guiding light.

I also express my sincere appreciation for both my sons, and my daughter-in-laws for their guidance from time to time. Of course I got much required support of my wife. My Grand-daughter is a constant source of inspiration for me. Blessings of my mother are always with me.

Thank you all my dear friends and relatives to always stand by my side to support and encourage me in my professional endeavours.

I am also enclosing the salient features of this Utility. This Utility can be downloaded from the link provided at my website: [www.prgupta.com](http://www.prgupta.com)
